

Part 1: Creating the Project

Solution Code

Here's what I coded up in the videos to show you how I would have completed the challenge. I hope yours looks the same!

If it does, well done!

If it doesn't though, don't worry - just compare what you did and what I did to learn from the exercise and better luck next time! Either way, you're still learning and improving all the time with every move you make - so well done too!

Code Listings

App.java

```
package com.javaeasily.demos;

public class App {
    public static void main(String[] args) {
        System.out.println("Loan Calculator");
    }
}
```
